

## ROUND PLASTIC TANKS R SERIES

| Description                                | Spare part code | Assembly code | L (mm) | Weight  | Actual filling volume (lt) |          |
|--------------------------------------------|-----------------|---------------|--------|---------|----------------------------|----------|
|                                            |                 |               |        |         | Horizontal                 | Vertical |
| 0,4 l round horizontal / vertical mounting | H50403001       | 0,4R / 0,4RV  | 90     | 0,07 Kg | 0,45                       | 0,35     |
| 0,7 l round horizontal / vertical mounting | H50403002       | 0,7R / 0,7RV  | 124    | 0,09 Kg | 0,75                       | 0,62     |
| 1,2 l round horizontal / vertical mounting | H50403003       | 1,2R / 1,2RV  | 186    | 0,14 Kg | 1,17                       | 1,05     |

|                     |                                                                      |
|---------------------|----------------------------------------------------------------------|
| Material            | PE-HD neutral / transparent color (DO NOT EXPOSE TO DIRECT SUNLIGHT) |
| Fluid               | Mineral based oil ISO/DIN 6743/4                                     |
| Working temperature | -15 / +70°C                                                          |

Note: the piping kit, standard suction filter, filler/breather and discharge plug are included when specifying the tank in PPM assembly code  
 When ordering spare parts, only the discharge plug and filler/breather are included
